TECHNICAL SKILLS

Languages

TypeScript Python Go SQL

HTML/CSS

Frameworks & Libs

React Next.js Node.js FastAPI

GraphQL

Cloud & DevOps

AWS Docker Kubernetes CI/CD

Terraform

EDUCATION

B.S. in Computer Science

Stanford University

2014 – 2018

CERTIFICATIONS

AWS Solutions Architect

Amazon Web Services (2022)

CKA (Kubernetes Admin)

CNCF (2023)

LANGUAGES

English: Native / Fluent

Portuguese: Native

Spanish: Intermediate

PROFESSIONAL SUMMARY

Results-driven Senior Software Engineer with over 8 years of experience in designing, building, and scaling high-performance web applications and distributed cloud backend systems. Proven track record of leading cross-functional engineering teams, optimizing microservice architectures, and delivering resilient enterprise SaaS solutions.

WORK EXPERIENCE

Staff Full Stack Engineer

2022 – Present

Apex Cloud Solutions • San Francisco, CA

- Architected and launched a real-time analytics pipeline processing over 50M daily events using Node.js, Go, and Kafka, reducing latency by 40%.
- Led a team of 6 engineers in migrating legacy monolith frontend to Next.js and TypeScript, improving PageSpeed performance scores from 45 to 92.
- Implemented infrastructure-as-code using Terraform and AWS, cutting cloud operational costs by 22% annually.

Senior Backend Software Engineer

2019 – 2022

DataForge Tech • Austin, TX

- Designed enterprise REST and GraphQL APIs serving 2M+ active monthly users with 99.99% uptime.
- Engineered scalable PostgreSQL data schemas and Redis caching strategies, decreasing database response times by 35%.
- Mentored junior engineers and established automated CI/CD pipelines using GitHub Actions and Docker containers.

Full Stack Developer

2018 – 2019

Nexus Digital Lab • Palo Alto, CA

- Developed responsive web applications for fintech clients using React, Redux, and Python/FastAPI.
- Integrated secure third-party payment gateways (Stripe, Plaid) complying with PCI-DSS standards.

KEY PROJECTS

Open Source Distributed Cache Monitor

Created a popular lightweight CLI and dashboard tool in Go to visualize Redis cluster node states (2,500+ GitHub stars).
